## WHO WE ARE

We care about the world we live in, and we want to protect it for the future. We are experts in handling emergencies on land or at sea, and we work diligently to make things better and safer. With a legacy of professionalism spanning over 30 years serving the Pacific Northwest, we are “First in Response, First in Service.”

## OUR MISSION

With over 30 years of service in the industry, NWFF has assembled a team of scientists, engineers, and technicians to meet the needs of our clients. Our mission is to provide a safer, cleaner, and less hazardous environment through education, remediation, and technology. We strive to be leaders in emergency preparedness and response, workplace safety, and environmental services. First in Response, First in Service is our goal on every project. NWFF applies a “roundtable” approach to project management and problem-solving. With our professional and technical services, employees work together on complex projects, identifying solutions and discussing them, while all potential liabilities are examined by subject matter experts. We understand that dealing with environmental challenges can divert time and resources away from your core mission. Our clients rely on us to deliver accurate and cost-effective solutions, supported by technical expertise and professional credentials that are directly relevant to the services we provide.

## OUR STORY

NWFF began operations in 1989 in Philomath, Oregon, as a wildland fire-fighting operation, thus the name “Northwest Fire Fighters” or NWFF. Over the years, NWFF diversified its service offerings and adapted to the growing demand for environmental services and emergency spill response. NWFF quickly earned a reputation for providing competent, professional, and efficient cleanup of land and water-based spills, as well as the environmental remediation that follows. NWFF holds many longstanding spill response agreements and service contracts with public and private entities throughout the Pacific Northwest and Alaska. In 2018, the founder of NWFF retired, and the business was purchased by new owners. Under the new leadership, the company continued to grow and diversify further with the addition of new lines of business focused on professional services, including Environmental Consulting, Health & Safety, Business Continuity, and Engineering. In the spring of 2019, NWFF acquired Environmental Contracting Solutions, Inc. (ECS), a Kodiak, Alaska-based company that provided single-source health, safety, and environmental consultancy. The acquisition of ECS also included a fire extinguisher servicing business and retail safety store – NWFF Fire and Safety.

# NWFF CORE BUSINESS FUNCTIONS

## PROFESSIONAL SERVICES

## ENVIRONMENTAL SERVICES

NWFF Environmental Services stands as a beacon of excellence in the environmental sector, offering an unparalleled diversity of services tailored to meet the unique challenges of each project. With a robust team of Qualified Environmental Professionals (QEP), NWFF ensures meticulous oversight of all environmental activities, guaranteeing compliance with the most stringent regulatory standards. Their comprehensive approach encompasses everything from risk management to emergency response, making NWFF a trusted partner in safeguarding the future of our planet.

## ENGINEERING SERVICES

At NWFF, our engineering team is not just a group of experts; they are pioneers in navigating the intricate web of environmental and compliance regulations. With professional engineering licensures across Oregon, Washington, Alaska, and Idaho, our team brings a wealth of knowledge and a multi-regional perspective to every project. Our comprehensive suite of engineering services, from environmental design and permitting to stormwater systems design and remediation, is tailored to streamline compliance processes, ensuring that our clients meet and exceed regulatory standards. We pride ourselves on delivering cost-effective solutions that don't just meet the bar—they raise it. Our commitment is to enhance operational efficiency and reduce costs while maintaining the highest standards of environmental stewardship. Choose NWFF for engineering excellence that leads to sustainable success.

## ENVIRONMENTAL SERVICES:

- Contaminated soil/site sampling
  - ◆ Phase I and Phase II site assessments
  - ◆ Contaminated water sampling
  - ◆ Emergency spill response
  - ◆ Accident investigation
  - ◆ Chemical discharges
  - ◆ Industrial tank decommissioning
  - ◆ Spill prevention, control, and countermeasures (SPCC)
  - ◆ Emergency support equipment for local governments
  - ◆ Environmental remediation concepts
  - ◆ Natural attenuation designs

## ENGINEERING SERVICES:

- ◆ Expertise in environmental and compliance regulations across multiple states.
- ◆ Professional engineering licensures in Oregon, Washington, Alaska, and Idaho.
- ◆ Comprehensive services, including environmental design, permitting, and compliance planning.
- ◆ Specialized in stormwater systems design and facility audits.
- ◆ Conducts SPCC activities and environmental site assessments.
- ◆ Offers utility mapping, inspections, and remediation design.
- ◆ Dedicated to enhancing operational efficiency and reducing compliance costs for clients.

## HEALTH & SAFETY

At NWFF, we believe that a robust health and safety program is not just a regulatory requirement but a moral imperative. Our commitment to safeguarding the well-being of workers and the public is woven into the fabric of our operations. We understand that a proactive approach to risk management and industrial hygiene is essential in fostering a resilient safety culture. Our seasoned professionals, boasting credentials such as Certified Industrial Hygienists (CIH) and Certified Safety Professionals (CSP), are at the forefront of guiding businesses through the complexities of OSHA compliance.

We recognize that the path to a sustainable safety culture is a journey that involves every tier of an organization. It's not just about meeting standards; it's about exceeding them and setting new benchmarks in safety excellence. Our team is dedicated to implementing strategies that address immediate risks and anticipate potential future challenges.

We are acutely aware that many employers may overlook or misunderstand the significance of near misses, critical indicators of potential hazards. These oversights can lead to reactive measures that may fail to provide effective control and could inadvertently breach OSHA regulations. Our approach is different. We emphasize the importance of understanding the root causes of near misses and transforming them into opportunities for learning and improvement.

By partnering with NWFF, businesses can expect a comprehensive safety program tailored to their unique needs. We deliver tailored solutions that integrate seamlessly into existing operations, ensuring that safety becomes an integral part of daily activities. Our goal is to empower employees at all levels to take ownership of their safety and the safety of their colleagues.

In conclusion, NWFF is not just a service provider; we are your partner in building a legacy of safety that protects lives and enhances the overall health and productivity of your workforce. Let us help you turn safety into your competitive advantage.

## HEALTH & SAFETY SERVICES:

- ◆ Chemical exposures
- ◆ Indoor air quality issues
- ◆ Methamphetamine testing
- ◆ Respirable particulate matter
- ◆ Silica dust monitoring
- ◆ Molds/toxins/allergens
- ◆ Ergonomics
- ◆ Air monitoring
- ◆ Confined Space Rescue
- ◆ Meters and testing devices
- ◆ Hazardous materials surveys
- ◆ Shipyard competent persons
- ◆ Noise dosimetry

## BUSINESS CONTINUITY

NWFF is a beacon of foresight and preparedness in today's fast-paced and unpredictable business environment. Our Business Continuity and Disaster Planning division is not just a service; it promises stability in the face of uncertainty. We understand that the traditional reactive stance towards risk management is outdated and a gamble that companies can no longer afford to take. That's why our proactive approach is designed to be comprehensive, covering all facets of risk management from the ground up.

Our team, comprising seasoned professionals with extensive experience in developing robust plans for national companies, is dedicated to delivering a comprehensive range of risk management services. We specialize in incident management team training, with realistic exercises that prepare your staff for any eventuality. Our vulnerability and risk assessments are meticulously crafted to identify potential threats, while our business impact analyses provide a clear picture of how these threats could affect your operations.

We go beyond the basics with our plan development, ensuring that every strategy is tailored to your organization's unique needs. Our program management is top-notch, overseeing the implementation and maintenance of your business continuity strategies to guarantee they perform when needed most. Moreover, we address emerging concerns head-on, with specialized expertise in areas such as workplace violence preparedness and pandemic planning—which have become increasingly critical in recent years.

At NWFF, we believe that minimizing risk is not enough; we aim to maximize your company's resiliency. This means not just surviving disruptions but thriving despite them. Our business continuity division is committed to transforming potential chaos into a structured response, turning what could be a disaster into a display of your company's strength and adaptability. With NWFF, you're not just protecting your assets but investing in a resilient future. Let us help you turn risk into reassurance and uncertainty into unwavering confidence.

## BUSINESS CONTINUITY SERVICES:

- ◆ Risk Management
- ◆ Team Training Exercises
- ◆ Business Impact Analysis
- ◆ Program Management
- ◆ Third-Party Quality Control
- ◆ Recovery Plan Development
- ◆ Government Contract Requirements

## TRAINING SERVICES

At NWFF, we redefine the paradigm of professional training by offering a suite of services that are as versatile as they are comprehensive. Whether it's on-site at your company, within the state-of-the-art facilities at NWFF, or through our cutting-edge remote learning platforms, we ensure that your team receives the highest caliber of instruction in Health, Safety, and Environmental Services. Our Subject Matter Experts are not just trainers; they are seasoned veterans with a wealth of practical knowledge, having spearheaded national safety seminars and contributed to significant projects in the field. This fusion of real-world experience and academic prowess equips our SMEs to provide training that is not only in-depth but also resonates with the participants, transcending the conventional and often uninspiring methods of video and PowerPoint instruction. Choose NWFF for an educational experience that is engaging, effective, and tailored to the real-world demands of your industry.

## REMOTE TRAINING CAPABILITIES

NWFF's remote training program utilizes cutting-edge technology to provide an unparalleled learning experience. Our dynamic courses are designed to accommodate your unique learning pace, offering a personalized educational experience. Engage with real-world scenarios crafted by industry professionals, ensuring that the knowledge you gain is current and applicable. Benefit from individualized attention with our one-on-one support, which fosters growth and collaboration. Embrace the convenience of learning from anywhere, at any time, without the added costs of travel and accommodation. Invest in your future with NWFF's remote training – where your potential meets our expertise.

## TRAINING SERVICES:

- ◆ CPR/AED/First Aid
- ◆ Fall Protection
- ◆ Rope Rescue high/low angle
- ◆ Hearing Conservation
- ◆ Respiratory Protection
- ◆ Personal Protective Equipment (PPE)
- ◆ Hazard Communication
- ◆ Lock-Out / Tag-Out
- ◆ Machine Guarding
- ◆ Confined Space Entry & Industrial Rescue
- ◆ Industrial Powered Equipment
- ◆ OSHA 10 & 30 hour (Construction & General Industry)
- ◆ Hazardous Waste Operations and Emergency Response (8hr, 24hr & 40hr)
- ◆ Lead Safety in Renovation, Repair, and Painting
- ◆ Bloodborne Pathogens

## TECHNICAL SERVICES

## EMERGENCY RESPONSE

At NWFF's Technical Services Division, our commitment to excellence is unwavering. "First in Response, First in Service" is not just our motto—it's the standard we strive to uphold. From the moment we receive a call to the final report, our dedicated team works diligently to ensure every project is handled precisely, keeping our clients' interests, regulatory compliance, and safety at the forefront. Trust us to deliver unparalleled service every step of the way.

## LAND-BASED

NWFF's Technical Services Division is dedicated to delivering unparalleled responsive services within the industry. Our expert teams are on standby 24/7, every day of the year, ensuring immediate action to emergencies and routine environmental situations. We handle a range of incidents, from minor fuel spills to major chemical releases on land or in water. NWFF can swiftly deploy skilled personnel, state-of-the-art equipment, and necessary supplies to effectively manage and resolve environmental emergencies of any magnitude throughout the Northwest. Our management personnel, proficient in all aspects of project management, facilitate seamless coordination with local, state, and federal agencies, guaranteeing transparent communication with our clients regarding all project details.

## MARINE BASED

NWFF's Technical Services Division is a beacon of environmental protection, expertly equipped to tackle waterborne incidents with precision and speed. Recognized by the US Coast Guard as an Oil Spill Response Organization, NWFF boasts an impressive arsenal of containment booms, boats, and skimmers ready to safeguard our precious waterways. With over 7,000 feet of containment boom and a fleet of vessels manned by skilled marine operators, NWFF is your trusted partner in preserving the integrity of our aquatic ecosystems.

## EMERGENCY RESPONSE SERVICES:

### Land Based

- ◆ 24/7 Availability Teams are ready to respond anytime, on any day.
- ◆ Expertise in Environmental Response, handling everything from minor spills to major chemical releases.
- ◆ Land and Water Incidents: Equipped to manage situations on both terrains.

- ◆ QI, SI, and ICS services
- ◆ Advocate for clients with the government and agencies
- ◆ Swift Water Rescue

## INCIDENT MANAGEMENT

NWFF stands at the forefront of emergency response, offering a robust and comprehensive incident management service. Our seasoned team of professionals is well-equipped to coordinate with various government agencies in addressing large-scale environmental incidents. With a proven track record of managing Type-3 incidents, NWFF boasts a dynamic roster of Incident Commanders, Safety Officers, and other key personnel well-versed in the Incident Command System. Our commitment to efficiency and cost-effectiveness ensures that every project is executed swiftly without compromising safety or quality. Trust NWFF to deliver unparalleled incident management solutions when they matter most.

## NATIONAL OVERSIGHT

The NWFF Technical Services Division serves as a beacon of assurance in the environmental services sector, providing unparalleled oversight and management of national projects. With a steadfast commitment to compliance and satisfaction, NWFF ensures that every government mandate is meticulously adhered to, guaranteeing a harmonious resolution for all stakeholders involved. Their expansive reach, extending throughout diverse industries and sectors, is underpinned by a legacy of professionalism and a robust portfolio of over 9,000 completed projects. For those seeking a partner that embodies the pinnacle of environmental excellence and unwavering dedication to community safety and ecological sustainability, look no further than NWFF.

## INCIDENT MANAGEMENT SERVICES:

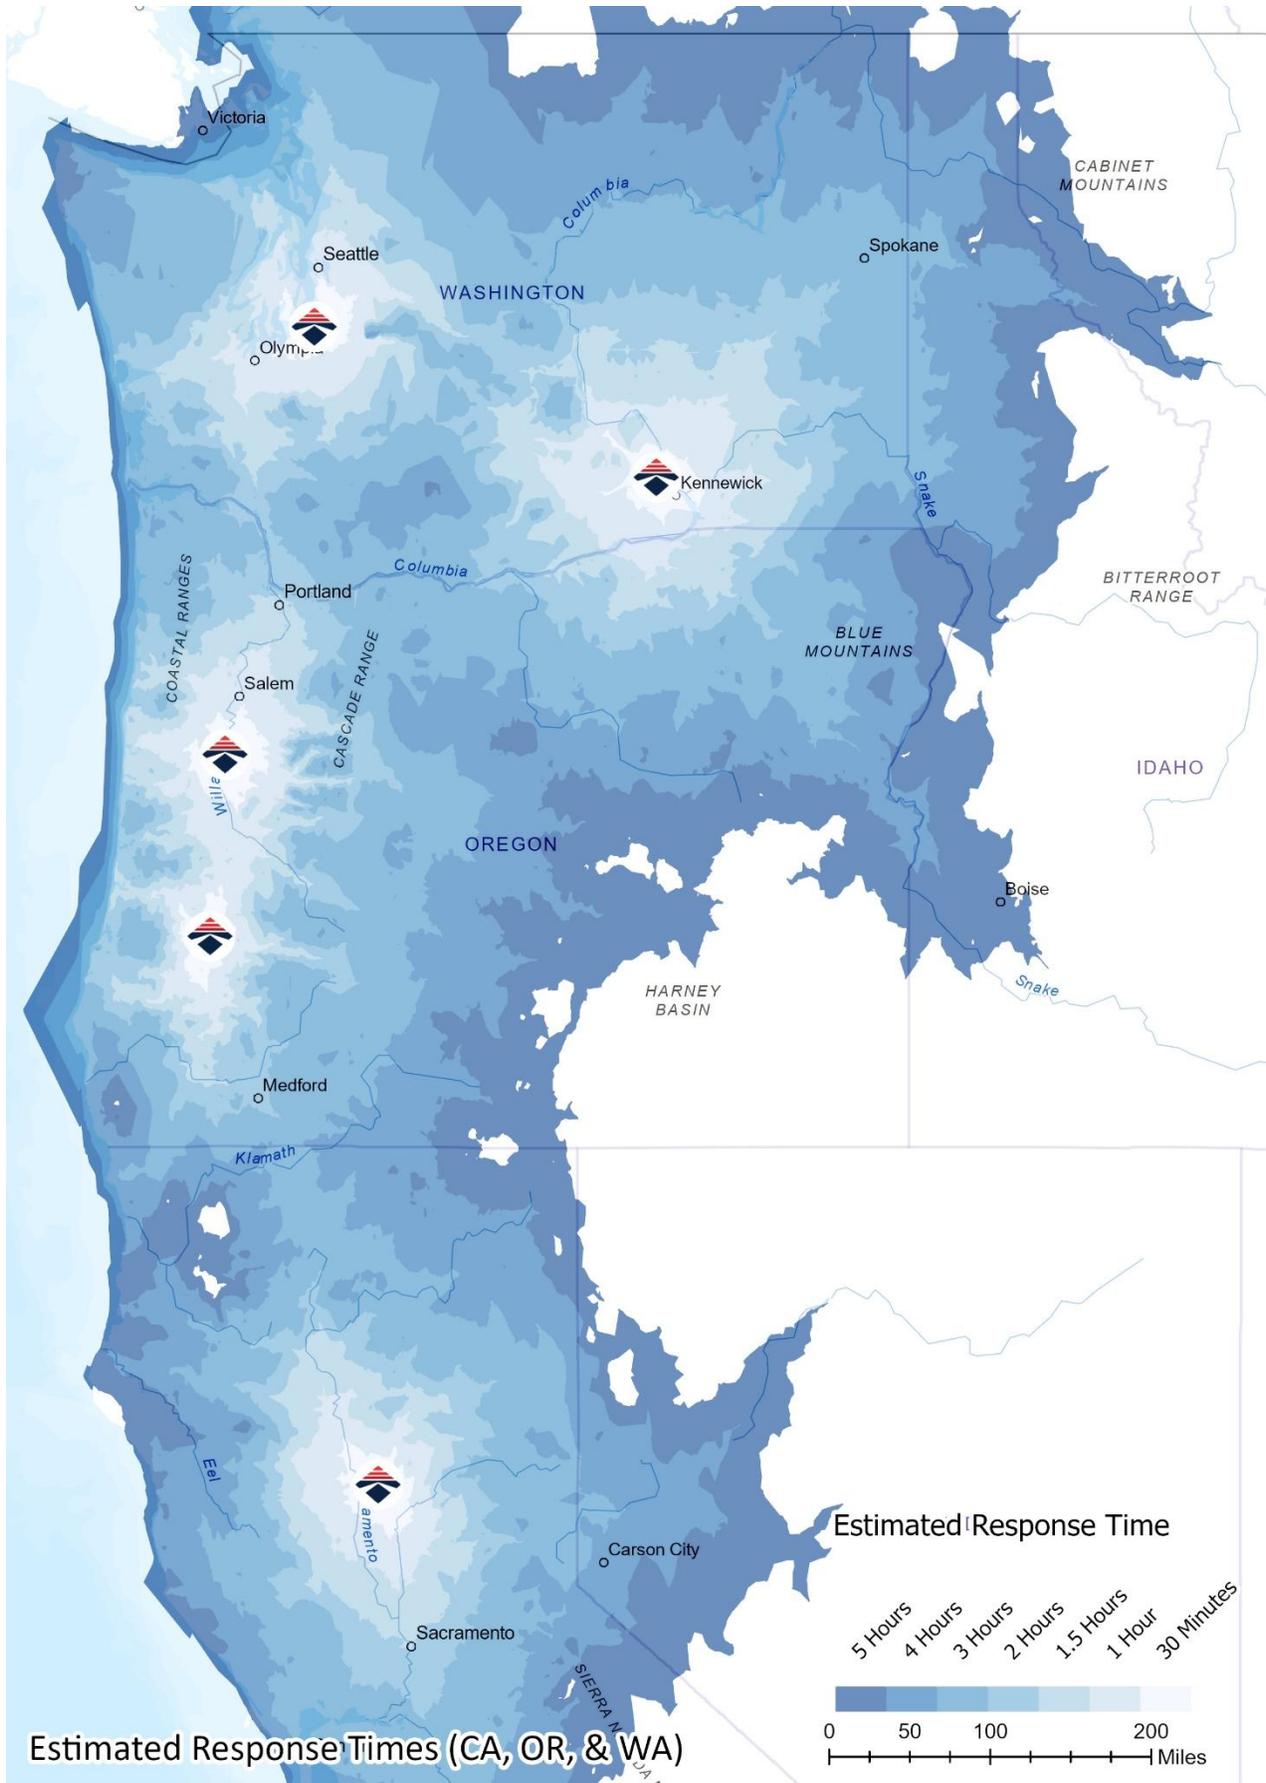

- ◆ Specializes in emergency response and incident management.
- ◆ An experienced team is skilled at coordinating with government agencies in response to environmental incidents.
- ◆ Track record of managing Type-3 incidents with a skilled Incident Commander and a roster of Safety Officers.
- ◆ Committed to efficiency and cost-effectiveness, ensuring swift execution without compromising safety or quality.

## NATIONAL OVERSIGHT

### SERVICES:

- ◆ Provides oversight and management of environmental projects nationwide.
- ◆ Ensures compliance with government mandates for stakeholder satisfaction.
- ◆ Extensive experience across various industries, with over 9,000 successful projects.
- ◆ Dedicated to community safety and ecological sustainability, representing environmental excellence.

# ESTIMATED EMERGENCY RESPONSE TIMES

## REMEDIATION

NWFF Environmental is a beacon of excellence in environmental remediation, setting high standards of quality and professionalism. With over 30 years of dedicated service in the Pacific Northwest, NWFF has completed over 9,000 projects, serving a diverse clientele that includes local, state, federal, and private sectors. The company's expansive reach, with offices throughout Alaska, Oregon, Washington, and California, ensures a rapid and efficient response to any environmental challenge.

The team at NWFF comprises highly skilled professionals, including licensed engineers and seasoned safety experts, who are well-versed in handling emergencies on both land and water. Their comprehensive services range from health and safety, emergency response, and environmental consultancy to specialized training and support. NWFF's commitment to sustainability and modern technology is evident in its adoption of the latest engineering practices and effective time management, enabling it to achieve regulatory compliance and foster community involvement.

For businesses seeking a partner in environmental safety, NWFF offers a culture of continuous safety improvement, helping clients navigate complex environmental regulations and achieve their safety goals. Their emergency response team is prepared to tackle hazardous situations with expertise, tools, and qualified staff, ensuring swift and effective action. Additionally, NWFF offers high-quality solutions for the safe removal and treatment of hazardous substances, including drug remediation and hazardous materials (HazMat) services.

NWFF's engineering services demonstrate flexibility and responsiveness, enabling them to manage both small- and large-scale projects with precision. Their confined space rescue services underscore their commitment to safety and efficiency, providing necessary oversight and industrial rescue personnel. Moreover, NWFF's disposal services can handle waste disposal projects of any scale, from residential to industrial.

In summary, NWFF Environmental is not just a service provider but a partner in protecting the environment and ensuring the safety of communities. Their legacy of professionalism, combined with a forward-thinking approach to environmental challenges, makes them a trusted ally in pursuing a safer and cleaner world.

## REMEDIATION SERVICES:

- ◆ Waste characterization analyses and remedial action plan development.
- ◆ Characterize, profile, and manifest waste for treatment and disposal.
- ◆ Crime scene cleanup
- ◆ Illicit lab processing
- ◆ Asbestos abatement
- ◆ Lead abatement.
- ◆ Excavate contaminated soil using surgical removal and waste segregation.
- ◆ Secure acceptance and negotiate the lowest costs for treatment, recycling, and disposal facilities.
- ◆ Transport and dispose of contaminated soil
- ◆ Provide full-service Vacuum truck services.
- ◆ Locate and certify clean backfill, load, and transport to the remediation site
- ◆ Decontaminate, demolish, and close industrial facilities.
- ◆ Repackage, transport, and dispose of drummed waste and PCB transformers.

## DISPOSAL MANAGEMENT SERVICES

NWFF Environmental is a beacon of excellence in environmental management, offering a comprehensive suite of services tailored to safeguard your company's future. With over 30 years of dedicated service in the Pacific Northwest, NWFF has completed more than 9,000 projects, serving a growing clientele that exceeds 3,200. Their expertise spans various sectors, providing professional and technical services that address each industry's unique challenges. From emergency response to environmental consultancy and from health and safety to hazardous material remediation, NWFF's multifaceted approach ensures that every aspect of ecological risk is managed with precision and care.

Their commitment to sustainability and community involvement is evident in their meticulous selection of disposal paths. By collaborating with a network of trusted partners, NWFF ensures that all recycling and disposal options are thoroughly vetted, minimizing potential liabilities long after the waste has been processed. Their disposal services are not just about managing waste, but also about recovering value wherever possible through product recovery, beneficial reuse, and metal reclamation. Even the most challenging waste streams are handled with a cradle-to-grave approach, ensuring secure disposal in hazardous waste landfills or neutralization through acid/alkali treatment.

Innovation is at the heart of NWFF's operations, utilizing modern technology and the latest engineering practices to deliver effective time management and regulatory compliance. Their EPA-approved waste transportation services reflect a commitment to safety and environmental assurance, providing a single-source solution for all waste management needs. Whether containerized waste pickup, lab packing services, or complex waste characterization, NWFF's expertise offers peace of mind, knowing that your environmental responsibilities are in capable hands.

NWFF's presence across Alaska, Oregon, Washington, and California enables it to respond swiftly to any environmental challenge. Their estimated response time maps for these regions demonstrate their readiness to serve, ensuring that help is always nearby. The company's legacy of professionalism is built on a foundation of trust, reliability, and a deep understanding of the environmental landscape. By choosing NWFF, you're not just selecting a service provider; you're partnering with a leader in ecological excellence, dedicated to protecting your company's interests and the world we share.

## DISPOSAL MANAGEMENT SERVICES:

- ◆ Lab packing Services.
- ◆ Waste Documentation
- ◆ Container Sales: New and Reconditioned
- ◆ Waste Identification and Characterization
- ◆ Containerized Waste Pickup and Transport
- ◆ Hazardous, Non-Hazardous, Universal, Used Oil, and Recycled Wastes

## NWFF FIRE AND SAFETY STORE

At NWFF, we're thrilled to announce the opening of our new retail safety store in Kodiak, Alaska, a one-stop shop for all your safety needs. Our shelves are stocked with an extensive range of top-quality safety supplies, including durable safety glasses, reliable fall protection gear, comprehensive first aid kits, and a diverse selection of gloves tailored to various industries. We understand the importance of hearing protection and offer a variety of solutions to safeguard your ears, alongside high-visibility jackets and vests to ensure you're seen in any environment. Our safety labels promote a culture of safety awareness, while our hard hats and knee pads provide the robust protection you deserve.

We're proud to feature renowned national brands, including Pelican, 3M, Pyramex, Quiet Brand, Peltor, Tyvek, and MSA, which are recognized for their commitment to safety and quality. Our knowledgeable staff is on hand to guide you in selecting the perfect safety gear that meets the specific requirements of your job, ensuring maximum protection and comfort. Thanks to our established relationships with national distributors and vendors, we can offer highly competitive pricing on both individual items and bulk orders, passing on the savings directly to you.

In response to the evolving retail landscape and changing customer preferences, NWFF is excited to be at the forefront of the digital shift by developing a robust e-commerce platform. This online shopping option will enable both existing and new customers to effortlessly purchase safety supplies from the comfort of their homes or offices. Our online store, accessible at [www.nwffsales.com](http://www.nwffsales.com), showcases our full inventory of safety products, making it easier to find exactly what you need.

Beyond sales, the NWFF Safety Store offers additional services, including equipment rental and repair, to ensure your gear is always in top condition. We also provide certified audiometric testing and respirator mask fit testing conducted by our trained professionals to help maintain your health and safety compliance.

For more information about our products and services, or to inquire about our competitive pricing, please don't hesitate to contact us at (907) 486-2960. At NWFF, your safety is our top priority, and we're committed to equipping you with the best gear and services to keep you protected on the job. Welcome to the NWFF Safety Store – where safety meets service excellence.

## FIRE AND SAFETY SERVICES:

- ◆ Comprehensive Safety Supplies  
Offering a wide range of safety products, including glasses, gloves, hearing protection, and more.
- ◆ Top-Quality Brands Featuring trusted brands like Pelican, 3M, and Tyvek to ensure quality and reliability.
